

# FACTORY UPGRADE

## STAGE 2 NEXT GEN MUSTANG ECOBOOST

(FITMENT: 2015-2023 FORD MUSTANG ECOBOOST(2.3L ENGINE))

### KEY FEATURES

- \* Direct drop-in replacement / installation without modifications (no adapters needed)
- \* High efficiency Next GEN CEA® compressor wheel for more HP, better response, & less lag
- \* Dual ceramic ball bearing for more durability & better response
- \* Investment Cast HK30 Stainless turbine housing designed to withstand high temperatures
- \* Divided twin scroll turbine housing for improved throttle response
- \* Ported shroud compressor housing for enhanced compressor map width.
- \* Includes new gaskets and silicone couplers including 3" in for popular intakes (aftermarket and/or stock)
- \* 1 year No Fault- No Hassle Warranty
- \* Low RPM response for increased top end performance.

**POWER RATING:** **610HP**

### **SPECS: (PART #: 11930)**

Compressor wheel inducer / exducer: 56mm / 76mm  
Turbine wheel inducer / exducer: 62.23mm / 56mm  
Max RPM: 180,460 RPM  
50-state legal / CARB EO # which is D-99-11

## NEXT GEN FACTORY UPGRADE

The Stage 2 Next GEN Mustang EcoBoost turbocharger is proven to outperform our very successful NX2 turbocharger. With a state-of-art 56mm Next GEN compressor wheel machined from a 2618 aluminum forging combined with our new compressor cover machining technology, this new version will provide 90 more horsepower compared to the current NX2.

\* Tune/tuner required which is not included with turbo / \*\*ECOBOOST, FORD, and MUSTANG are registered trademarks of Ford Motor Company, which is not in affiliation with Precision Turbo or Wabtec
